

## Item Coupons

### How to Use the Item Coupons

1. Choose the applicable item that will be couponed. You must select the item first before you can utilize the coupon.
2. Go to Make a Selection.
3. Go to Item Coupon.
  - a. Example of the \$1.00 off Chobani Coupon

4. The coupons that are linked to the location will appear. Select the desired Coupon.
5. Once the Coupon is select the discount will appear directly below the couponed item.
  - a. Example of the 50% off R&B coupon applied

6. Tender out the transaction like normal.

### Trouble Shooting and Tips

- Coupon can't be applied error message. If you receive this error message then one of two situations has occurred:
  - o An item that is not applicable for the coupon has been selected
  - o An item coupon has been attempted to be used more than once on the same item
- Only predetermined items can be used with a coupon. This is to prevent items from being couponed that shouldn't be discounted.
- You can only use a coupon once per item. If you try to use the same coupon more than once on the same item it will display the error message "Coupon Can't be Applied".
- Use the report "Item Coupon Report" from the web client to generate a report on coupons utilized.
